

CLEMENT TRICART

DevOps Engineer with over 10 years of experience, specializing in the design, development, and management of cloud infrastructures for businesses of all sizes. I help companies define and deploy their cloud infrastructures in an automated, secure way while optimizing costs.

I also support developers by providing them with the right tools, assisting with defining delivery pipelines, and helping them iterate quickly and smoothly, from development environments to production.

SKILLS

- AWS
- GCP
- Terraform
- Ansible
- Docker
- Packer
- Cloud Run
- ECS + Fargate
- GKE
- EKS
- K3S / K8S
- S3
- GCS
- RDS
- CloudSQL
- GitLab CI
- GitHub Actions
- Jenkins
- Telegraf
- InfluxDB
- Grafana
- CloudWatch
- Bash
- Python

EXPERIENCE

DEVOPS (FREELANCE) | NEONOÏA, PARIS | MARCH 2016 - PRESENT

- Definition of architectures based on requirements, automation, and deployment of Cloud infrastructures, primarily on AWS/GCP.
- Cost reduction related to Cloud infrastructures (FinOps), through the configuration of scheduled environments, preview, on-demand, and tag management.
- Assistance to development teams in adopting DevOps best practices for defining deployment strategies, CI/CD, and secret management.
- Implementation of scalable deployment pipelines using GitLab Runners and EC2 Spot instances.
- Development of Terraform modules to meet specific needs.
- Configuration of GKE/EKS clusters (dedicated node pools, tags, service accounts, secret management).
- Maintenance of Cloud infrastructure services in operational conditions, including the setup of monitoring dashboards.

DEVOPS | MYLITTLEPARIS, PARIS | JUNE 2015 - MARCH 2016

- Definition and assistance to development teams in creating and managing Dockerfiles for all group projects.
- Development and maintenance of application deployment pipelines for Symfony using Ansible, Capifony, and CircleCI.
- Analysis of technical issues and maintenance of the group's websites in operational conditions.

APPLICATION ENGINEER | NYSE / EURONEXT, PARIS | APRIL 2011 - MAY 2015

- Migration of all automation scripts from IBM AIX/Unix to RedHat Linux.
- Development of BASH and Python scripts to ensure consistent deployment of applications.
- Critical environment requiring configuration and management of high availability for all trading applications.
- Collaboration in multidisciplinary teams with developers, system administrators, network administrators, and database administrators.
- Complete redesign of the monitoring system (Nagios / SNMP / RRDTool).
